Water Fire Extinguishers

Page 3 of 7

Water should never be used to tackle a Class F fire. If water is used a **boil over** will occur where the water sinks to the bottom of the pan and instantly turns to steam causing an explosion of steam, fire and burning oil.

Water fire extinguishers should **NOT** be used on Live Electrical Equipment or Class B, Class C or Class D fires.

Click **NEXT** to move on.

Remember: Class F is cooking oil and fat.

Remember: Water conducts electricity. These extinguishers should **NOT** be used around live electrical equipment.

Fire Extinguisher
WATER
Safe for: Wood, Paper, Textiles etc. ✓
Not for: Live electrical equipment ✗
Not for: Flammable liquids ✗
Not for: Gasous fires ✗
Not for: Flammable metal fires ✗

How To Use A Fire Blanket On A Cooking Oil Fire

- ◆ Turn off the heat source if it is safe to do so. Do not attempt to move the pan.
- ◆ Pull the tapes to release the blanket from its packet.
- ◆ Hold the blanket in a shield position at arm's length.
- ◆ Wrap the blanket around your hands for protection.
- ◆ Place the blanket gently over the pan/container to smother the fire.
- ◆ Turn off the heat source if it wasn't possible before. Do not attempt to move the pan.
- ◆ Leave the pan to cool completely. Do not attempt to uncover until it is completely cool.
- ◆ Leave the fire blanket in place for at least 30 minutes.

- ✓ Assured by RoSPA Qualifications
- ✓ Certified by CPD
- ✓ Audio voiceover
- ✓ Downloadable certificate on completion
- ✓ 100% online training
- ✓ No time limits

Our Fire Extinguisher Awareness online training course ensures learners understand what the different types of Fire Extinguishers are, how to identify them and what types of fire they should be used on.

The aim of this training course is to give you the confidence to use fire extinguishers or a fire blanket, safely and effectively during an emergency.

The approximate duration of this training is 1 hour.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress.

Our training licences **don't expire** and are only assigned to a learner when they launch the training. Substantial discounts are available for bulk purchases.

Learners are able to download their certificate on successful completion of the online assessment.

ENGAGING, RELEVANT, COST EFFECTIVE TRAINING

Fire Extinguisher Awareness

ABOUT FIRE

- The three essential elements needed for fire.
- How removal of one of the elements will extinguish a fire.
- The five classes of fire.

LEGAL ISSUES

- Key legislation and standards relating to fire extinguishers.
- Who is responsible for ensuring fire extinguishers are available in a building.
- The minimum number of extinguishers required.
- When extinguishers must be checked and serviced.
- Where fire extinguishers are located within a building.

USING A FIRE EXTINGUISHER

- When you should and should not tackle a fire.
- What can happen if you use the wrong type of fire extinguisher.
- The basic PASS method used to operate a fire extinguisher.

WATER FIRE EXTINGUISHERS

- The colour code for a water fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a water fire extinguisher on.
- How a water extinguisher puts out a fire.
- Where to aim a water fire extinguisher.

WATER MIST FIRE EXTINGUISHERS

- The colour code for a water mist fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a water mist fire extinguisher on.
- How a water mist extinguisher puts out a fire.
- Where to aim a water mist fire extinguisher.

DRY POWDER (ABC) FIRE EXTINGUISHERS

- The colour code for a dry powder fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a dry powder fire extinguisher on.
- How a dry powder extinguisher puts out a fire.
- Where to aim a dry powder fire extinguisher.

DRY POWDER (M28 AND L2) FIRE EXTINGUISHERS

- The colour code for a dry powder M28 or L2 fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a dry powder M28 or L2 fire extinguisher on.
- How a dry powder M28 or L2 extinguisher puts out a fire.
- Where to aim a dry powder M28 or L2 fire extinguisher.

FOAM FIRE EXTINGUISHERS

- The colour code for a foam fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a foam fire extinguisher on.
- How a foam extinguisher puts out a fire.
- Where to aim a foam fire extinguisher.

CO2 FIRE EXTINGUISHERS

- The colour code for a CO₂ fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a CO₂ fire extinguisher on.
- How a CO₂ extinguisher puts out a fire.
- Where to aim a CO₂ fire extinguisher.

WET CHEMICAL FIRE EXTINGUISHERS

- The colour code for a wet chemical fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a wet chemical fire extinguisher on.
- How a wet chemical extinguisher puts out a fire.
- Where to aim a wet chemical fire extinguisher.

LITH-EX FIRE EXTINGUISHERS

- The colour code for a Lith-Ex fire extinguisher.
- The classes of fire you SHOULD and SHOULD NOT use a Lith-Ex fire extinguisher on.
- How a Lith-Ex extinguisher puts out a fire.
- Common devices that use Lithium ion batteries.
- Where to aim a Lith-Ex fire extinguisher.

FIRE BLANKETS

- The types of fire that a fire blanket can be used on.
- How to use a fire blanket on a cooking oil fire.
- How to use a fire blanket on a person whose clothes are on fire.
