- ✓ Certified by CPD
- ✓ Audio voiceover
- ✓ Downloadable certificate on completion
- ✓ 100% online training
- ✓ No time limits

Our online Spill Kit Training for Chemicals & Oils identifies the risks associated with hazardous substances at work and teaches best practices when handling spills in the workplace.

It is essential for every organisation to identify what substances might be spilt and what quantity of the substance could be spilt. A risk assessment will determine the number of spill kits necessary, and what items needs to be in them. Additionally, it will help identify any extra personal protective equipment that may be required.

The approximate duration of this training is 1 hour.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress.

Our training licences **don't expire** and are only assigned to a learner when they launch the training. Substantial discounts are available for bulk purchases.

Learners are able to download their certificate on successful completion of the online assessment.
